

Landscape, 844 by 390. The dashed zone is where the floating stick can appear.

1. **Floating stick.** Appears under your thumb in the left 40%. Past the dashed ring you sprint.
2. **Sneak.** Hold or toggle, set in options.
3. **Action.** Hold to chop or attack, with a haptic tick on each hit.
4. **Interact.** The icon changes by context: loot, door, car, wrench, flag.
5. **Quick use.** Eats or heals with the best item in one tap.
6. **Throw.** Drag to aim, release to throw.
7. **Hotbar.** Tap to equip, swipe for more, swipe up for the backpack.
8. **Minimap.** Roads and teammates. Long-press to ping.
9. **Chat and honk.** Chat opens the emote wheel and quick messages.
10. **Stats.** Infection, weight and noise appear only when they matter.
11. **Menu.** Pause, map and backpack.
12. **Camera.** Snap left or right, or drag empty space to orbit.

Phone, driving

Switches on automatically when you take the driver seat. The on-foot buttons fade out.

1. **Steer.** Two big buttons that ramp up the longer you hold. Options: a virtual wheel or tilt.
2. **Gas.** Hold to accelerate.
3. **Brake and reverse.** Tap to brake, hold to reverse.
4. **Drift.** The handbrake, for sharp turns.
5. **Horn.** Tap, or hold for a long honk. Zombies hear it.
6. **Car controls.** Seat switch, engine key (hold to crank), headlights, exit.
7. **Radio.** Tap for the next station, hold for off.
8. **Gauges.** Speed, fuel, engine health and damage warnings.
9. **Camera.** Drag empty space to orbit.

Same sizing rules as on foot: 48 px targets, 12 px gaps, safe areas respected.

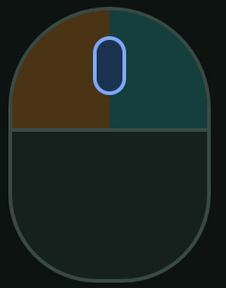

Keyboard and mouse

The white label is on foot. The amber label is in the car. A single white label means the same thing in both.

Mouse

- **Left click** action or attack
- **Right click** aim, release to throw
- **Middle drag** orbit. **Wheel** zoom.
- **Middle click** ping

Hold G for the emote wheel. Home recenters the camera behind you. Shift-click moves a stack between backpack and trunk.

Phone, whirlybird

Switches on when you take the pilot seat. Lift both thumbs and it hovers.

1. **Stick.** Move in any direction. The helicopter turns toward where you push.
2. **Climb.** Hold to rise through the ground, low and high bands.
3. **Descend.** Hold to come down.
4. **Land.** Lowers you slowly over flat, clear ground. The prompt appears when it is safe.
5. **Top row.** Winch (hold to lower, release to raise), searchlight, horn, boost, exit or rappel (hold when low).
6. **Gauges.** Altitude band and fuel.
7. **Warnings.** Zombie on the skids, low fuel, wind gusts, bird strike.
8. **Camera.** Drag empty space to orbit.

With the engine off, a Start engine button appears in the center. Hold it for the 4 second spool-up, which is loud.

Phone, boat

The driving layout with water-specific labels, so thumbs already know it.

1. **Steer.** Two big buttons that ramp up the longer you hold.
2. **Throttle.** Hold to go.
3. **Reverse.** Tap to slow down, hold to go backward.
4. **Anchor.** Holds the boat in place instead of drifting.
5. **Horn.** Tap, or hold for a long honk.
6. **Boat controls.** Seat switch, engine key, lights, leave the boat.
7. **Radio.** Tap for the next station, hold for off.
8. **Gauges.** Speed, fuel and hull. A leak opens the hull patching mini-game.
9. **Camera.** Drag empty space to orbit.

Hovercraft and snowmobile reuse this layout, with Anchor swapped for Drift.
